

NexGen Analytics Capability Statement

NGA is specialized in full-stack custom software services in HPC environments, with an emphasis on C++ skills and task-based runtimes. We have been providing custom software services for Sandia National Laboratories since Fiscal Year 2016. Operating under a CPA and Time & Material contracts, NGA is currently engaged in a wide range of Sandia projects, whether applications or libraries, including within the Extreme- Scale Developer ToolKit (xSDK).
